SUMMARY

Experienced Full Stack Developer Architecting Scalable Solutions

With over **20 years** of experience in software development, I have built and led innovative web applications across multiple industries, including **e-commerce, real estate, telecommunications, and temporary accommodation rental**. My expertise spans **frontend and backend development**, software architecture, and leadership roles such as team lead, project manager, and founder.

I specialize in **PHP, NodeJS, ReactJS, NextJS, VueJS, NuxtJS**, and database management with **MySQL, PostgreSQL, MongoDB, MariaDB, SQL Server, and Oracle**. I also have **deep expertise** in cloud computing (**AWS, Docker**) and system scalability.

Holding a **college degree in System Analysis**, I thrive in **fast-paced environments**, solving complex technical challenges, optimizing performance, and mentoring teams to deliver high-impact solutions.

EDUCATION

Systems Analyst - UTN - National Technology University

From: 1997 - 2005

Buenos Aires, Argentina

TECHNOLOGIES

AWS, Docker, Javascript, Typescript, NodeJS, ReactJS, NextJS, VueJS, NuxtJS, CSS, HTML5, PHP, Laravel, CodeIgniter, MongoDB, MariaDB, MySQL, SQL Server, PostgreSQL, Oracle

WORK EXPERIENCE

Global Innovation - Argentina, USA, Mexico and others - Senior Full Stack Developer / Contractor / Freelancer

From: May 2007 - To: Present

Techs: Typescript, ReactJS, NextJS, VueJS, PHP, NodeJS, Laravel, Docker

Databases: PostgreSQL, MongoDB, MySQL, Oracle, SQL Server.

This company is my personal brand as developer, I have been working with it since 2007.

Lately I've been working as a fulltime developer in several US companies and helping some local startups on their early stages on my weekends and free time.

I used to deal with clients, in my daily dealings with them, I make custom requirements, and estimate project scope for trade budget, scope, negotiate the dates of payments and deliverables for each milestone.

Once approved the budget, I make a deeper analysis, which is discussed later with the client, making the necessary adjustments before the technical and functional design. In general, projects are focused on web environments and web services depending on needs.

Some of the main clients:

- Welcome2BA.com: Platform development from the ground up, Slack, Calendars Sync, Online Payments, agency management. Customized PHP CodeIgniter and jQuery later Nuxt/Vue and PHP/Laravel.
- BairesApartments.com: Merged with welcome2ba.com, system migration towards Welcome2BA platform.
- Fanyion.com: Startup, SaaS multi-tenant platform created from the ground up, PHP Laravel API and Next frontend UI.

Exomindset - USA - Senior Full Stack Developer

From: August 2025 - To: June 2026

Clients:: OpenInfra Foundation (OpenStack) and FNTech

Technologies Used: ReactJS, Gatsby, PHP, Laravel, NodeJS, Docker, Decap CMS, Python, Django, OpenAPI, Open Telemetry

Migration of open source and private source code projects:

- Migrated several pages from SilverStripe (PHP) to Gatsby (ReactJS)
 - Decap CMS (former Netlify CMS).
 - Gatsby microsites creation.
 - Implementing OpenAPI (former Swagger) in Laravel (PHP) APIs
 - Implementing OpenAPI (former Swagger) in Django (Python) APIs
 - Doing reverse engineering to document the different API's endpoints (+~1200)
 - Open Telemetry implementation in Laravel (PHP) APIs
 - Open Telemetry implementation in Django (Python) APIs
-

Command Link - USA - Senior Full Stack Developer

From: May 2024 - To: May 2025

Technologies Used: Typescript, ReactJS, PHP 8.X, Yii, Laravel, Docker, MySQL Server (Azure Max Scale), MS SQL Server (Azure).

- SaaS multi-tenant platform for network management and monitoring, with a complex architecture and several microservices.
- Leverage the legacy platform to improve performance.
- Connect React and legacy applications to work together.
- Create APIs to integrate different part of the company to achieve async communication.
- Scaffolding a brand new React development repository.
- Scaffolding several new PHP Laravel API development repositories.

Globant - Argentina - Senior Web UI Developer

From: January 2024 - To: May 2024

Client - Kingdom of Saudi Arabia: Kayanee.com

Technologies Used: Shopify, Liquid, Vanilla Javascript, HTML, jQuery, CSS.

- **Shopify** project
- Performance enhancement **from 16s to 0.8s load time** to user interaction.
- Change Javascript code to enhance and improve performance to avoid locking times.
- Home page video loading **from 24s to <1s** using advanced streaming techniques.
- Detect bottle necks on code to optimize.
- Keynote speaker in a performance seminar for junior developers.

Pest Share - USA - Senior Full Stack Developer

From: March 2023 - To: September 2023

Technologies Used: NextJS, ReactJS, PHP, Laravel, CodeIgniter, Docker, MySQL Server (AWS RDS), AWS (S3 and EC2).

In my 6 months project in Pest Share I've:

- Created the SDK code to submit pest control request from any web page.
 - Moved part of the project to ReactJS and into a new way of doing software.
 - Fixed bugs in the legacy code.
 - Integrated the legacy code with the new ReactJS code.
 - Solved various DB issues in the legacy code.
 - Solved the database synchronization between old and new tables.
-

Mahisoft - USA - Senior Full Stack Developer

From: November 2021 - To: January 2023

Startup Client: BidMyListing.com

Technologies Used: Typescript, NodeJS, ReactJS, NextJS, Docker

- Real Estate SaaS as a marketplace platform.
- Node API in Express.js with Typescript.
- Frontend in React built from scratch.
- Pixel perfect frontend developer.
- Experienced with Agile/SCRUM methodology and sprint-based development.

Willdom - USA - Senior Full Stack Developer

From: March 2021 - To: November 2021

Client: Lacure Villas, temporary rental agency for luxury villas

Technologies Used: NodeJS, VueJS, PHP, PostgreSQL, MongoDB.

In my time working with Lacure Villas I have:

- Stabilized the old system (Vue + old Laravel), so the business can still work and then start design and develop a new system.
 - Created a calendar synchronization process across different providers using PHP Laravel.
 - Improved the response time and reduce the downtime of the internal process
 - I laid the groundwork for online payments.
 - I have help debug and improve the connection with the ERP
 - I have help debug and improve the connection with CRM (Zoho)
-

Wortise - Argentina / Uruguay - Lead Developer

From: May 2020 - **To:** January 2021

Techs: NodeJS, VueJS, PHP

Databases: MongoDB, MySQL, PostgreSQL, ElasticSearch, BigQuery.

- Fast-paced and dynamic startup environment with a strong culture of innovation and collaboration.
- Develop internal business support software and implement strategic changes within the core Ad Server infrastructure.
- Lead and contribute to ambitious, disruptive projects that push the boundaries of ad tech and digital innovation.
- Actively participate in analysis and decision-making processes, sharing insights and collaborating with a highly talented team.
- Foster a deep sense of ownership and commitment, driven by the team's energy and shared purpose.

aluGuest.com - Co-Founder, CTO and Senior Developer

From: April 2012 - **To:** January 2017

Technologies Used: PHP, Laravel, CodeIgniter, CakePHP, jQuery, Javascript, MariaDB, MongoDB, ReactJS
1

- Multi-tenant platform for temporary accommodation rentals targeting the Latin-American market.
- Spearheaded the development of aluPays, a proprietary credit card processing solution with its own API and full integration, complementing external providers like Braintree and PayPal.
- Led a multidisciplinary team of designers and developers to build the platform from the ground up, overcoming complex technical and operational challenges.
- Oversaw day-to-day operations, managed budgets, and ensured alignment between product development and business goals.
- Considered one of the most rewarding and formative experiences in my career, combining entrepreneurship, innovation, and leadership.
